

Leaf protection systems for gutters

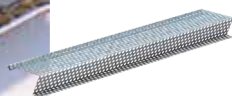

make it easy...

The SAREI leaf protection systems for gutters protect your gutter from clogging with leaves and other unwanted deposits, thus preventing expensive maintenance costs.

SAREI leaf protection made of aluminium

It is easily and conveniently attached to the gutter by inserting and securing the leaf guard. The leaf guard is made of high-quality aluminium, has a high level of stability and is rust-free for life. Available for every gutter size.

Material: natural aluminium
(high stability, rust free for life)
Length: 1.25m
Fastening: Clamp with storm clip
(2 pieces included)

SAREI - plastic leaf guard

It is easily and conveniently attached to the gutter by buckling and bending the leaf stopper. It is then placed in the gutter and clamped.

You do not need any additional fastening material!

If necessary, several sections can be connected to one another by plugging them together.

Material: Polypropylene
(UV stabilized, frost resistant), gray
Length: one VPE (4 pieces)
is sufficient for 2,32 m
Fastening: integrated clip system
