

Drip edge no. 1

The drip edge is used for the production of professional roof and connections on the roof. The use of the profile ensures controlled water drainage on the roof surfaces and protects the covering from penetrating water.
The universally applicable verge termination is suitable for many roof coverings and gives the roof a visual Rounding.

Coverage: welding web
Material: Aluminium natural, aluminium coloured, copper and zinc
Fastening: Spenglers screws and cardboard nails
Cut: 200 and 250 mm or special cut according to sketch (width before mechanical processing)
